Dear Dan,

We are re-introducing our past and present customers/contacts to ARM Inc. via this newsletter. What you will find in this or future issues are news items, updates to products and services, technical information on how best to preserve purity in your gas distribution systems and components, and on occasion some interesting perspectives on industry and news events that affect us all. We promise not to be intrusive, and hope you find the information useful. But if you'd prefer not to receive updates from us, there is a convenient unsubscribe link at the end of this newsletter, or simply reply with "remove" in the subject line.

[What's new?](#) [Where will we be?](#) [Latest installation & start-up!](#)

What's new?

We have recently updated www.arminc.com have a look, we are always open to feedback.

Product literature is available for Point-of-Use purifiers, the Nova Series In-line purifiers and the Pro-Panel Series small area purifiers on the [Standard Products](#) page on our web site. Or send us an [e-mail](#) and request a copy, we will send a hard copy if you provide a mailing address and/or reply with a PDF copy for your library.

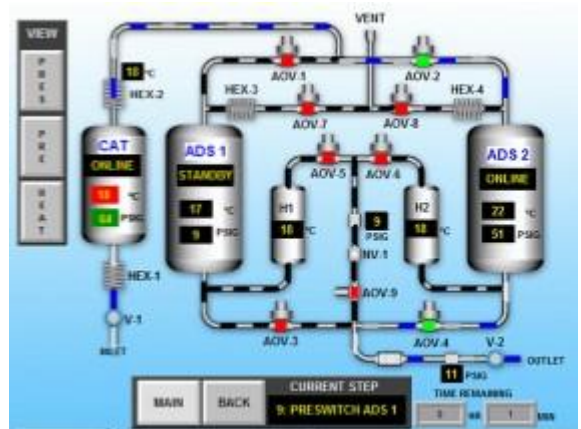

On the technical side, we have done a bit of everything, some more than just a bit. We design, manufacture, install, and maintain gas delivery solutions tailored to meet customer's requirements.

ARM's products begin at the bulk gas pad with UHP vaporizer switching assemblies, pressure control manifolds, bulk filtration systems, hose docking stations, and gas blenders to name a few.

ARM's bulk purifiers incorporate the latest controls and instrumentation technology, including graphic HMI, and remote access allowing support without an on-site visit.

There is an easy to complete [form](#) on our web site to begin the quote process by specifying your bulk purifier requirements.

Where will we be?

Engineering and sales personnel will be attending SEMICON West in San Francisco in July. Give us a call (719-538-5959) or [e-mail](#) and we can set up a time to meet to discuss your high purity and ultra high purity gas equipment requirements. ARM can design and build what you need to get gas from the pad to the point-of-use and keep it simple, keep it clean and keep it flowing.

Register to attend at www.semiconwest.org

July 14–16, 2015
Moscone Center, San Francisco

Latest Installation & Start-up!

ARM recently completed installation of a high purity nitrogen supply system at an electronics manufacturer in the southwest United States. The gas supplier provided the liquid storage tank and vaporizers and ARM designed and built the all stainless steel vaporizer switching module, pressure control and filtration modules, nitrogen purifier, and a dedicated fill hose purge assembly for the liquid storage tank. ARM not only provide equipment, we project managed the entire

installation effort, from sourcing local contractors to complete the on-site installation of all high purity stainless steel components and piping, to certifying purity of the overall installation using state of the art gas analyzers.

ARM provides services and equipment for both industrial gas suppliers and end users who have purity requirements that require special grade stainless steel throughout. For gas suppliers or end users who do not have experience with high purity stainless steel orbital weld capabilities, ARM is your ideal solution. Our combination of in-house module fabrication, on-site installation services, and project management makes us the industry leading "high tech" integrator.

Thanks for reading this far!

We understand that there is very little time in the day to read all the newsletters that make it to your inbox. We will strive to not be 'that company' spamming the world with useless information seemingly every other day for no better reason than some webinar told them that is what they should do.

As noted above if you opt out we will honor your request. If you do tho, you may want to like us on Facebook or follow us on LinkedIn so you can keep your inbox clear, but still keep in touch with what is going on with ARM Inc. in the gas world.

Sincerely,

Dan Spohn
